***Election/Restrictions***

Claims in the application are 1-31.

Restriction to one of the following inventions is required under  
35 U.S.C. 121:

5 I. Claims 1-27 and 31, drawn to a method of formulating a  
protein, classified in class 530, subclass 402.

II. Claims 28-30, drawn to a sensor containing a sensor body and  
an active protein disposed within the body, classified in  
class 435, subclass 25.

10 The inventions are distinct, each from the other because:

The method of invention I can be used without using the sensor of  
invention II, and conversely the sensor of invention II can be used  
without using the method of invention I. There is no requirement for  
protein contained by the sensor of II to be formulated as required by  
15 the method of I, and there is no requirement for protein formulated by  
the method of I to be used in the sensor of II.

Because these inventions are distinct for the reasons given above  
and have acquired a separate status in the art as shown by their  
different classification, restriction for examination purposes as  
20 indicated is proper.

Applicant is advised that the reply to this requirement to be  
complete must include an election of the invention to be examined even  
though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a  
25 non-elected invention, the inventorship must be amended in compliance

Art Unit: 1651

with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR

5 1.17(i).

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP § 821.04. **Process claims that depend from or otherwise include all the limitations of the patentable product will** be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on Treatment of Product and Process Claims in light of In re Ochiai, In re Brouwer and 35 U.S.C. § 103(b)," 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
